

COMPANY INTRODUCTION

Ningbo summer auto parts co.,td is a company focusing on the design, research and development, production and sales of auto parts, mainly dealing with auto exterior parts, auto interior parts, auto wheels, auto custom parts, especially the depth of research and development for the high-end luxury models such as Mercedes-Benz, Land Rover, BMW auto parts.

OUR ADVANTAGE

- 12000 TON Forged Technology
- Professional team for drawing design
- Monoblock | 2Pieces|3Pieces | H style|VIP style| Luxury Style| Super Light Weight
- Meet the customization needs of Various Colors
- Brand OEM | Private customization
- Door to Door shipment

WHY CHOOSE FORGED WHEELS?

HIGHER STRENGTH:

Forged aluminum rings are 1-2 times stronger than cast aluminum rings and 4-5 times stronger than general iron rings, so they are stronger, have better toughness and fatigue strength, and are more secure.

BETTER APPEARANCE:

Because the forged wheel has a tight structure and can withstand high stress, it can design some more lively thin spokes in terms of modeling design, and the freedom of design is also high, so that it can design a wheel that suits the overall appearance of the customer's car according to the owner's needs, making the car more personalized.

LIGHTER WEIGHT:

Forged wheels of the same size can be about 20% lighter in weight, and in addition, the light weight also makes the suspension's response speed significantly improved, so it can naturally handle road potholes more easily and reduce the feeling of bumps greatly.

HIGHER PERFORMANCE:

Upgrading the forged wheels increases the width of the wheels without affecting steering and loading, resulting in a more noticeable increase in sensitivity during acceleration, braking and cornering, and the car will feel noticeably lighter underfoot.

WHEEL FORGING PROCESS

A look at how they're made explains why forged wheels are the go-to choice for racing professionals. Here's a simplified version:

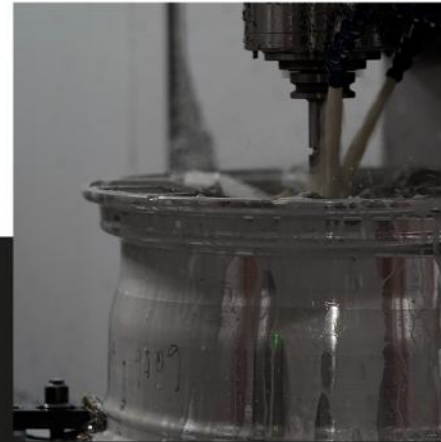

FORGED BLANK WHEEL

THE PREHEATED ALUMINUM IS FORGED INTO BLANKS BY STRAIGHT FORGING WITH A 12,000-TON FORGING PRESS.

LATHE PROCESS

THE STEP OF MACHINING THE SURFACE OF THE WHEEL BY LATHE TO CONFORM TO THE SIZE AND SHAPE REQUIRED BY THE DESIGN.

MILLING PROCESS

MILLING IS THE CUTTING OF THE WHEEL SURFACE BY A MILLING MACHINE TO ACHIEVE THE SHAPE AND SURFACE ROUGHNESS REQUIRED BY THE DESIGN.

MAKE HOLE

PERFORATING IS THE OPERATION OF DRILLING OR PUNCHING HOLES IN FORGED WHEELS FOR MOUNTING TIRE BOLTS

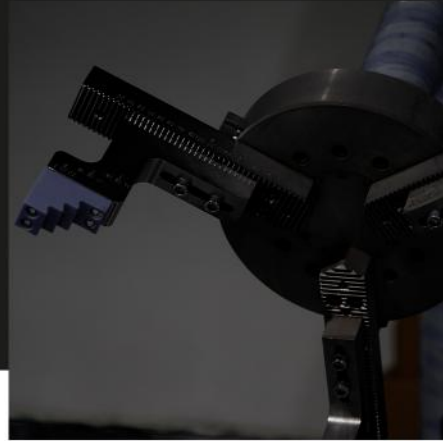

WHEEL FORGING PROCESS

A look at how they're made explains why forged wheels are the go-to choice for racing professionals. Here's a simplified version:

PAINTING

THROUGH A FINE PAINTING PROCESS, THE SURFACE OF THE WHEEL CAN ACHIEVE A SMOOTH AND UNIFORM EFFECT, WHILE THE ANTI-CORROSION PROPERTIES OF THE PAINT CAN EFFECTIVELY EXTEND THE SERVICE LIFE OF THE WHEEL.

POLISHED

BY POLISHING THE SURFACE OF THE WHEEL, THE SURFACE IS SMOOTHER, SHINIER, AND ADDS AESTHETICS AND REDUCES SURFACE ROUGHNESS.

MACHINED FACE

BY MEANS OF MECHANICAL PROCESSING, THE WHEEL SURFACE IS MADE FLATTER AND MORE PRECISE, THUS INCREASING ITS AESTHETICS AND REDUCING SURFACE ROUGHNESS, AND IMPROVING THE SERVICE LIFE OF THE WHEEL.

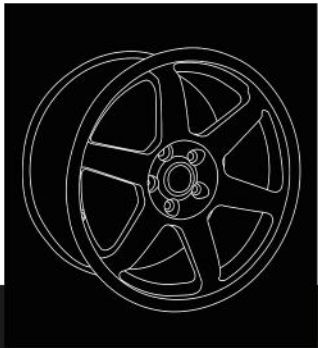

PACKING

THE WHEELS ARE PACKAGED TO PROTECT THEIR SURFACE AND REDUCE DAMAGE DURING TRANSPORTATION TO ENSURE THAT THEY REACH THE CUSTOMER IN GOOD CONDITION.

CUSTOMIZED PROCESS

IDEA

STEP 1

Brand customers tell us their idea or show us any photo about what they want to make

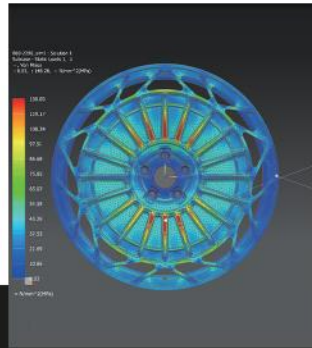

2D DRAWING

STEP 2

We will according to their request to make 2D drawing to let them confirm the size

STRESS TEST REPORT

STEP 3

After confirm the data of 2D drawing, we will make stress test report for customer check if strong enough

PRODUCTION

STEP 4

15days production time for make a bespoke wheel rims and share process photos with customers

SAMPLE

STEP 5

We will send the sample to brand customers

BULK ORDER

STEP 6

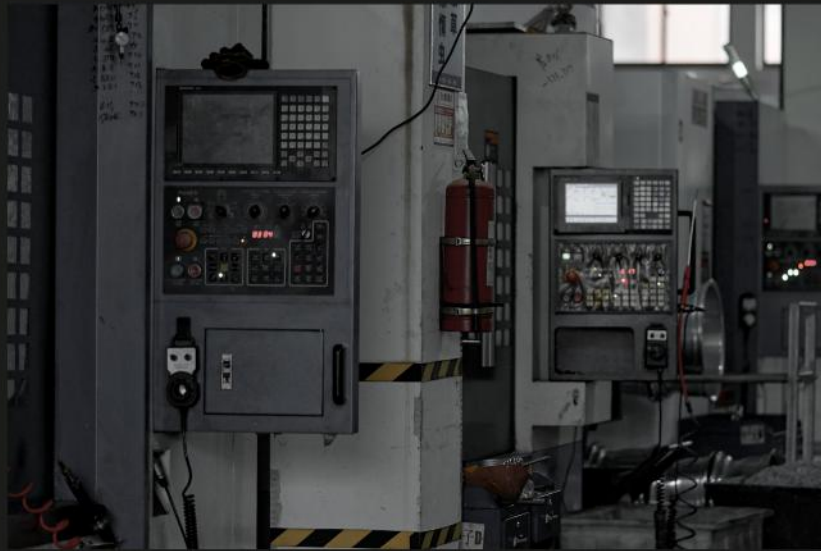

If you are satisfied with the sample then we will arrange the bulk for you

THE POWER OF MANUFACTURE

Kabeast Forged Focus on High End Luxury Car Wheel Rim Customized Project that working on Al-6061 T6 Forged Only, We are support OEM & ODM service and also support customized order by small MOQ request. Our Mainly dealing for the Forged Wheel Rims Design Support, Make Drawing. Special Packing, and help Hundreds of online customers drop shipping and Brand Building.
